

CL205 - Operating Systems Lab

Task#07

1. Re-do Q1 and Q2 from Task#06 (on slate) using shared memory.
2. In a c/c++ program create a process using the fork() system call & do the following:
 - ✓ The parent process sends a Termination signal to the child with a delay of 1 second for 5 consecutive seconds.
 - ✓ The child process keeps ignoring the signal and prints "I am not going to die" each time it receives the termination signal.
